SUMMARY

Controls Engineer focused on building and integrating real-world automation systems. Experience in PLC programming, industrial communication protocols, and hardware–software integration. Strong background in troubleshooting, testing, and system deployment.

TECHNICAL HIGHLIGHTS

- Experience working with large-scale industrial automation systems, including conveyors and AS/RS
- Strong troubleshooting skills in live production environments with minimal downtime tolerance
- Hands-on experience with onsite commissioning, system deployment, and validation
- Cross-functional collaboration with electrical, mechanical, and software engineering teams
- Experience supporting systems post-deployment, including on-call troubleshooting

EXPERIENCE

viasore SYSTEMS North America (Toyota Automated Logistics) May 2019 – Aug 2024
Clients Served: Mar-Jac Poultry, Tyson Foods, Gordon Food Service, General Motors, ... Grand Rapids, MI

Controls Engineer L2 May 2022 – Aug 2024

- Led onsite installation and commissioning of automated systems, collaborating with electrical, mechanical, and software engineers, as well as contractors
- Deployed and validated PLC controls logic for conveyor and AS/RS systems
- Developed and maintained HMI applications using Ignition and Studio 5000 environments
- Troubleshoot complex system issues during commissioning and production to minimize downtime
- Supported system testing, validation, and customer acceptance phases
- Recognized with the Firefighter Award for resolving critical system issues across multiple projects

Controls Engineer L1 Aug 2021 – May 2022

- Traveled to customer sites to test and debug automation system components
- Designed and implemented HMI interfaces for industrial applications
- Provided post-deployment support, including on-call troubleshooting and system maintenance
- Assisted in commissioning and system validation activities

Controls Co-op Engineer May 2019 – Aug 2021

- Managed controls inventory and component tracking
- Assisted with onsite system testing and validation
- Supported HMI design and development for automation systems

EDUCATION

Grand Valley State University Aug 2018 – Aug 2021
Bachelor of Science in Electrical Engineering GPA: 3.49

SKILLS

Programming: Python, C, Structured Text (ST), Ladder Logic
Control Systems: PLC (Allen-Bradley), HMI, SCADA, Industrial Automation Systems
Protocols: Ethernet/IP, TCP/IP, Serial (UART)
Tools: Studio 5000, Ignition, Electrical CAD
Systems: Conveyors, AS/RS
